*"I work out of a service van, so I go to as many as six jobs in a day. The satisfying thing about that is knowing that I solved at least six problems."*

*We do a lot of restoration jobs and we see people on their worst days whether it was fire, water loss, or tree falls. It's nice to get the lights turned back on.*

*On the job I worked really hard and learned as much as I could... off the job I wanted to get involved so I attended the Residential Unit meetings every month. As soon as I became a Journeyman I was offered a position on the Residential Unit Board, of which I am proud to be a part."*
